CYBER SECURITY CONSULTANT

Who we are

SA Group is a Cyber Security, P3M and Technical consultancy working in vital and highly complex Public Sector and Commercial markets. We specialise in helping clients in technical and digital environments scope and deliver against their critical challenges.

We have successfully delivered programmes, projects and technical solutions in the areas of IT, risk, procurement, assurance and certification compliance along with elements of security, from physical access to technical controls for HMG and industry.

We have bold expansion plans, focusing on delivering an expanded service offering to several market sectors. We're looking to expand our Cyber practice, serving customers in our existing core markets and growth opportunities too, especially in the field of Digital Transformation.

We're based in a beautiful rural location approx. 1 mile from Westbury, Wiltshire. The company consists of approximately 50 consultants and business support professionals but is growing all the time! We're a highly energetic, tenacious and meritocratic team, and pride ourselves on our grown up, people focussed values. We want our people to stay with us and focus strongly on training and development opportunities within the company.

SA Group is proud to be an equal opportunities employer.

Role summary

The opportunity to join our consulting team will require you to deliver Cyber Security services across a variety of industry sectors and maintain long term relationships with senior stakeholders in UK Defence, Public Sector and / or Commercial sectors.

Our four main areas of practice are;

- Security Strategy Risk and Compliance
- Cloud Security Solutions
- Public Sector & Defence
- ICS / SCADA / Smart Cities

As a member of our consultancy community you will be expected to lead a portfolio of cyber delivery engagements with clients, deliver high quality Cyber Security solutions and services, identify future opportunities and scope the engagements, contribute to the latest thought-leadership and industry research relating to cyber security and collaborate with our Head of Practice to develop the practice further.
