Cyber Maturity Assessment

SA Group's comprehensive Cyber Maturity Assessment service will give you a clear view of where your organisation stands and your focus should be, especially if you're embarking on a cyber improvement programme. Our methodology is aligned to a standard capability maturity model index which will score you against various cyber domains.

Benefits for your organisation include:

INSIGHT: Gain useful intelligence into threat sources, vulnerabilities and potential impact.

IDENTIFY GAPS: Uncover how vulnerable your data is to Cyber attack.

ARTICULATE CYBER SECURITY: Have the right information to be able to articulate security to key stakeholders.

MITIGATE RISK: Be able to take appropriate action to minimise the likelihood or impact of a cyber event.

EVALUATE YOUR ESTATE: Gain valuable intelligence into effective cyber security and baseline your posture.

Cyber Maturity Assessment

Our Cyber Maturity Services

Enterprise Security Maturity Assessment

- Covering your whole enterprise, this assessment will give you a clear maturity score as to your current control implementation, utilising either NIST or ISO 27001.

Cloud Security Maturity Assessment

- Enabling you to have a clear view of your cyber maturity within your cloud environments as based around CSA CCM.

NCSC CAF

- Utilising the NCSC Cyber Assurance Framework, this assessment will give you an understanding of your cyber maturity as detailed by the UK's technical authority on security.

CSOC Assessment

- Giving you valuable insight into how well your SOC is operating, our CSOC experts will also identify whether there are any gaps in your operating capabilities.

A comprehensive assessment model

Pre-assessment phase	• We will gain a full understanding of your requirements and conduct a scoping exercise with a cyber expert to ensure the assessment covers the areas you want.
Assessment phase	• You will be assigned a dedicated cyber specialist and we endeavour for this to be the same expert who conducted the scoping exercise. • The cyber expert will most likely require access to people, company policies, processes and technical configuration. As each assessment is slightly different, the level of information could change. • For the duration of the assessment the cyber expert will be available to you to discuss any aspect of it and, if required, the cyber expert can update you on a regular basis.
Report phase	• Once the assessment is completed you will receive a comprehensive report. • Every discovery within the report will be substantiated with evidence and recommendations for either fixing, increasing maturity or mitigating the risk, enabling you to make the most informed decision possible. • There will be a meeting after the report is issued to allow you to raise any further questions or clarify any aspect of the report.

SA Group's Cyber P3M Wrap™ Service Model

Our consultants blend P3M and Cyber expertise, encompassing a wider understanding of your organisation's needs and ensuring a more thorough, relevant delivery.

Why SA Group?

SA Group has been tested and appointed by Crown Commercial Services as a Supplier of Cyber Services to HM Government. We have a proven track record of delivering cyber assurance in the highest security environments, including the MoD and other government departments plus major blue chip commercial clients.
