

# Cyber Risk Assessment

SA Group's comprehensive Cyber Risk Assessment service will give you the intelligence you need into the Cyber risks your organisation is potentially exposed to. This will enable you to create appropriate response plans, allowing you to concentrate on what is most important to your company.

Benefits for your organisation include:

**INSIGHT:** Gain useful intelligence into threat sources, vulnerabilities and potential impact.

**IDENTIFY GAPS:** Uncover how vulnerable your data is to Cyber attack.

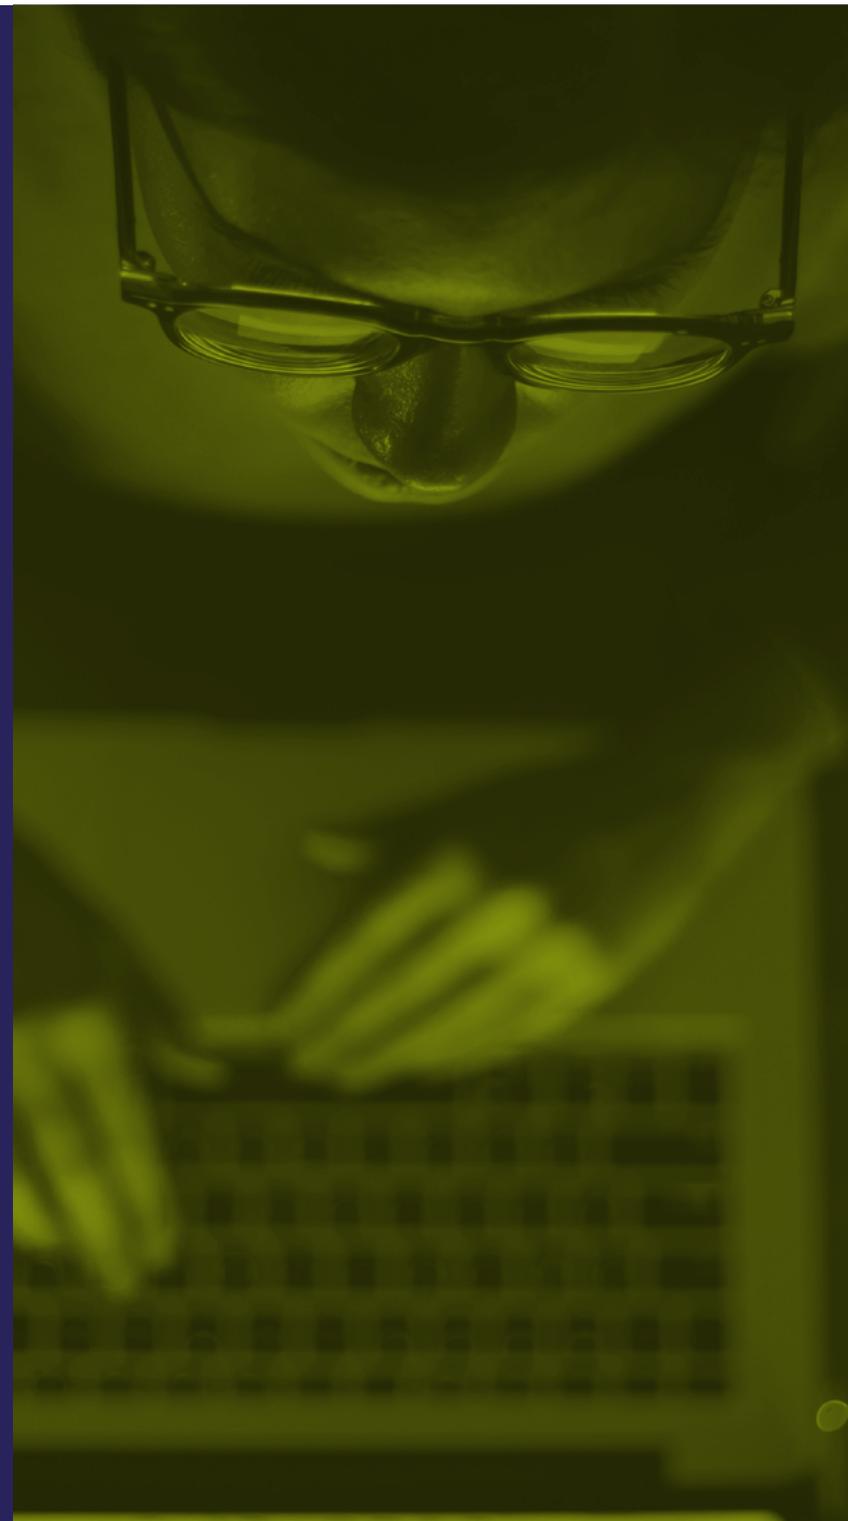

**ARTICULATE CYBER SECURITY:** Have the right information to be able to articulate security to key stakeholders.

**MITIGATE RISK:** Be able to take appropriate action to minimise the likelihood or impact of a cyber event.

**EVALUATE YOUR ESTATE:** Gain valuable intelligence into effective cyber security and baseline your posture.

## Cyber Risk Assessment

### We offer 2 levels of risk assessment:

#### Enterprise Security Risk Assessment:

- Our Enterprise Security Risk Assessment is designed to give you the intelligence as to the cyber risk present within your organisation as a whole.
- It encompasses every aspect of Cyber Security, the main purpose of which is to identify cyber risks which you may not be aware of.
- You will receive a Cloud Security Risk Assessment and a Supply Chain Risk Assessment as part of this overarching service.

#### Cloud Security Risk Assessment:

- Similar to our Enterprise Security Risk Assessment, the Cloud Security Risk Assessment is designed to give you the intelligence as to the cyber risk present within the cloud services you consume.
- In addition to assessing the services, we also look at the methods you use to connect to these services.

### A comprehensive assessment model

<b>Pre-assessment phase</b>	<ul style="list-style-type: none"><li>• We will gain a full understanding of your requirements and conduct a scoping exercise with a cyber expert to ensure the assessment covers the areas you want.</li></ul>
<b>Assessment phase</b>	<ul style="list-style-type: none"><li>• You will be assigned a dedicated cyber specialist and we endeavour for this to be the same expert who conducted the scoping exercise.</li><li>• The cyber expert will most likely require access to people, company policies, processes and technical configuration. As each assessment is slightly different, the level of information could change.</li><li>• For the duration of the assessment the cyber expert will be available to you to discuss any aspect of it and, if required, the cyber expert can update you on a regular basis.</li></ul>
<b>Report phase</b>	<ul style="list-style-type: none"><li>• Once the assessment is completed you will receive a comprehensive report.</li><li>• Every discovery within the report will be substantiated with evidence and recommendations for either fixing, increasing maturity or mitigating the risk, enabling you to make the most informed decision possible.</li><li>• There will be a meeting after the report is issued to allow you to raise any further questions or clarify any aspect of the report.</li></ul>

### SA Group's Cyber P3M Wrap™ Service Model

Our consultants blend P3M and Cyber expertise, encompassing a wider understanding of your organisation's needs and ensuring a more thorough, relevant delivery.

### Why SA Group?

SA Group has been tested and appointed by Crown Commercial Services as a Supplier of Cyber Services to HM Government. We have a proven track record of delivering cyber assurance in the highest security environments, including the MoD and other government departments plus major blue chip commercial clients.
